

Please do not ease up on the no call list. I am physically challenged and it has improved the quality of my life not to have to get up and answer nuisance telemarketing calls. I often have to lay down and rest during the day. Since the no call list has gone into effect, I no longer have to turn off the phone and worry my caregivers because they can't get ahold of me or not get any rest because of numerous telemarketing calls. Please do not change the no-call list.
